The first of these is the fact that the
 system is not a simple one, but a
 complex one, involving many factors
 which are not yet fully understood.
 The second is that the system is not
 a static one, but a dynamic one, in
 which the various factors are constantly
 changing and interacting with each
 other. The third is that the system is
 not a closed one, but an open one, in
 which the various factors are constantly
 exchanging with the environment.
 The fourth is that the system is not a
 linear one, but a non-linear one, in
 which the various factors are constantly
 interacting in a non-linear fashion.
 The fifth is that the system is not a
 deterministic one, but a probabilistic
 one, in which the various factors are
 constantly interacting in a probabilistic
 fashion.
